

ST7 WALL MOUNT

ADVANCED DESIGN FOR HEALTHCARE SETTINGS

To better serve the computing needs of clinicians in a variety of healthcare settings, InfoLogix designed the ST7 Wall Mount, a full-featured wall mount with superior design and build quality.

The ST7 Wall Mount offers a more compact solution than traditional wall mounted computer options as well as innovative features like an exterior that doubles as a dry-erase white board and a dual bay design to simplify and secure the work area.

Built for Form and Function

While wall mounted computers have become a standard choice for hospitals looking to provide convenient computer access to staff in constrained areas, they have typically been lacking in features that better fit the daily workflows of clinicians.

As experts in healthcare computing solutions, InfoLogix has created the ST7 Wall Mount to be the first computer enclosure that brings cutting-edge design and materials, increased security, and healthcare-centric features to any location within the hospital setting.

InfoLogix brings together EMR systems expertise, wireless and mobility capabilities and superior products like the ST7 Wall Mount to create ideal solutions for your hospital, all from a single provider.

Why the ST7 Wall Mount?

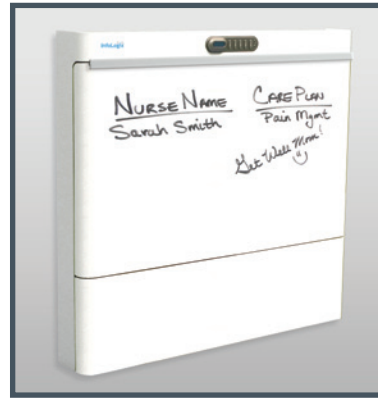

- **Workflow:** Designed by clinicians, the ST7 Wall Mount creates a secure and convenient area to record patient data and access technology for electronic bedside medication verification.
- **Design:** The exterior doubles as a white board for displaying nurse information, patient care plan and quick notes for the patient.
- **Size:** The ST7 Wall Mount is significantly lighter and smaller than a conventional wall mount unit.
- **Style:** With sleek rounded corners and a modern color scheme, the ST7 Wall Mount blends into the hospital décor.

ST7 Wall Mount Specs & Features

- Size: 30.5" H x 27.2" W x 4" D
- Weight: Less than 50 pounds
- Construction: Heavy gauge steel
- Handle: Anodized aluminum
- Finish: Specialty gloss paint that doubles as a white board
- Color: White with light grey accents
- Electronic keypad lock
- Scanner Brackets: Two barcode scanner brackets that accommodate specific needs
- Keyboard and mouse tray with a palm rest for wrist support
- Tech Bay: A separately locked area for secure PC and power supply storage
- Linear Dampeners: Allow the keyboard and mouse tray to close smoothly
- Monitor: Fits up to a 19" thin profile monitor
- Side Ventilation: Slots can also be used for simple power switch access
- Multi-purpose Cubby: A convenient cubby mounted on the inside of the unit made of Santoprene, a medical grade material that can be easily removed for cleaning
- Superior Cable Management: Routing ports keeps the work area free of cable clutter
- Warranty: 5 years

With a slim design, the ST7 Wall Mount is significantly lighter and smaller than a conventional wall mount unit.

The ST7 Wall Mount's special glossy white finish can also double as a white board

The New Era of Wall Mount

The ST7 Wall Mount has an array of features that transform the experience for caregivers and impress anyone who sees it. It has been designed by clinicians to be easy to use, compact to fit a wider variety of usages and innovative in the way it looks, feels and operates.

The ST7 Wall Mount features a wrap around outer shell that creates a soft and elegant form, while making it strong and compact. To minimize clutter and put the user closer to their technology, the ST7 Wall Mount is divided into two sections: a lower bay for the technology components and an upper bay for a monitor, keyboard, mouse and barcode scanner.

The unit is significantly smaller than a typical wall mounted unit. Because of this slim design, the ST7 Wall Mount only accepts thin profile monitors and thin client PCs. The overall weight of the ST7 Wall Mount has been minimized to less than 50 pounds, making installation quick and easy.

The InfoLogix ST7 Mobility Suite

The InfoLogix ST7 Mobility Suite is designed by clinicians, for clinicians to provide the ideal solutions to improve workflows and enable better patient care. Through the ST7 Mobile Workstation, Wall Mount and Mobile Clinical Assistant (MCA), InfoLogix empowers your hospital to perform better every day.
