InfoLogix eLearning Solutions

Customization of Siemens application content incorporates your facility's exact processes and procedures and is easily upgradeable to incorporate future enhancements.

Incorporation of other elements, such as medical carts, barcode scanners, and locking med drawers, so caregivers gain a comprehensive understanding of all elements of a solution.

Availability of additional tools such as LMS (Learning Management System), Assessment Certification, and Authoring ensures effective retention and facilitates easy updates to the application training.

Flexibility to choose course options including clickable images/icons, video scenarios, "Show Me" software demonstrations, software simulation exercises, and embedded questions.

Experience in developing multiple versions of MAK training for leading Siemens healthcare facilities. This allows us to provide you rapid development and deployment of this "customized" solution.

Advantages of Distance Learning

- Deploy training anywhere, anytime to allow access for unlimited users
- Make training available to new hires and contract workers
- Update material easily when future enhancements are made
- Cost effectively reduce the number of stand-up trainers needed and reduce nurses' time away from their patients
- Shorten implementation time due to multiple users taking the course simultaneously
- Increase retention by allowing users to learn at their own pace

Modules Offered

Below are a few modules we created for our customers:

- Siemens MAK Basics
- Administering Medications
- Verifying Orders
- Siemens Invision Clinicals
- Siemens Sorian Clinicals
