Mainboard Overview

BIOS Setup when 1st Power on

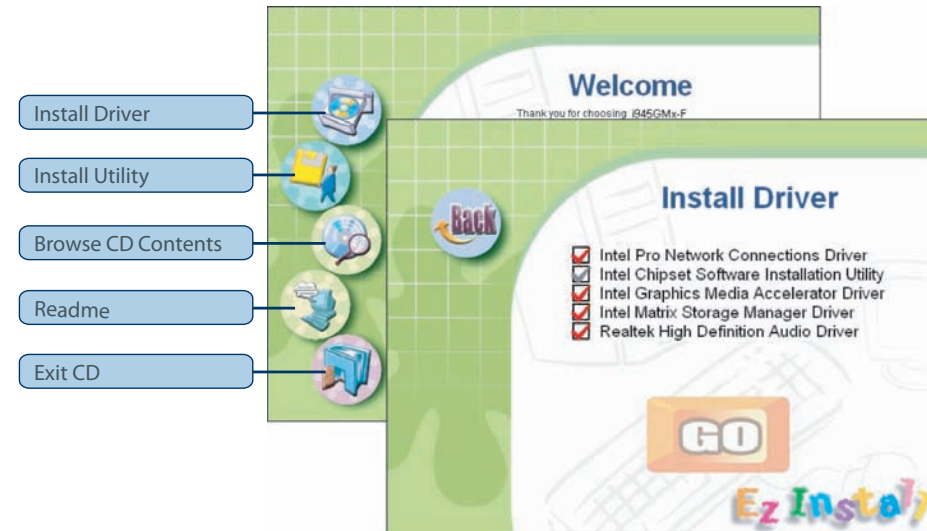

After connecting the correct cables to the device, power on and enter the BIOS Setup screen, then press during POST (Power On Self Test). Choose "Load Setup Defaults" for recommended optimal performance.

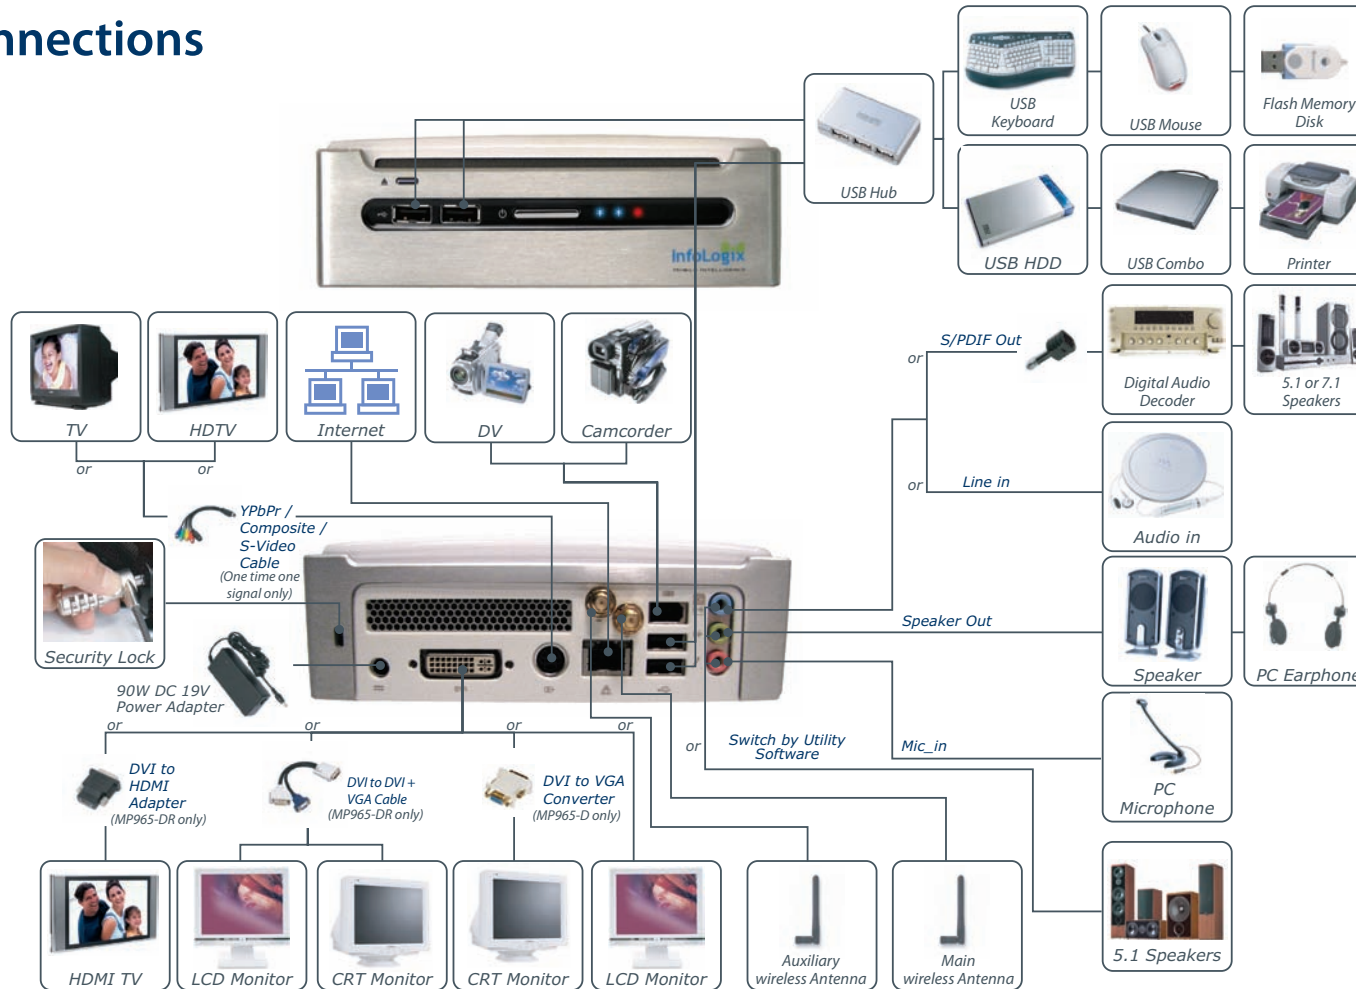

Installing Driver

By default, drivers ship installed on the PowerCube II. However, should you require the drivers for reinstallation, you have two options:

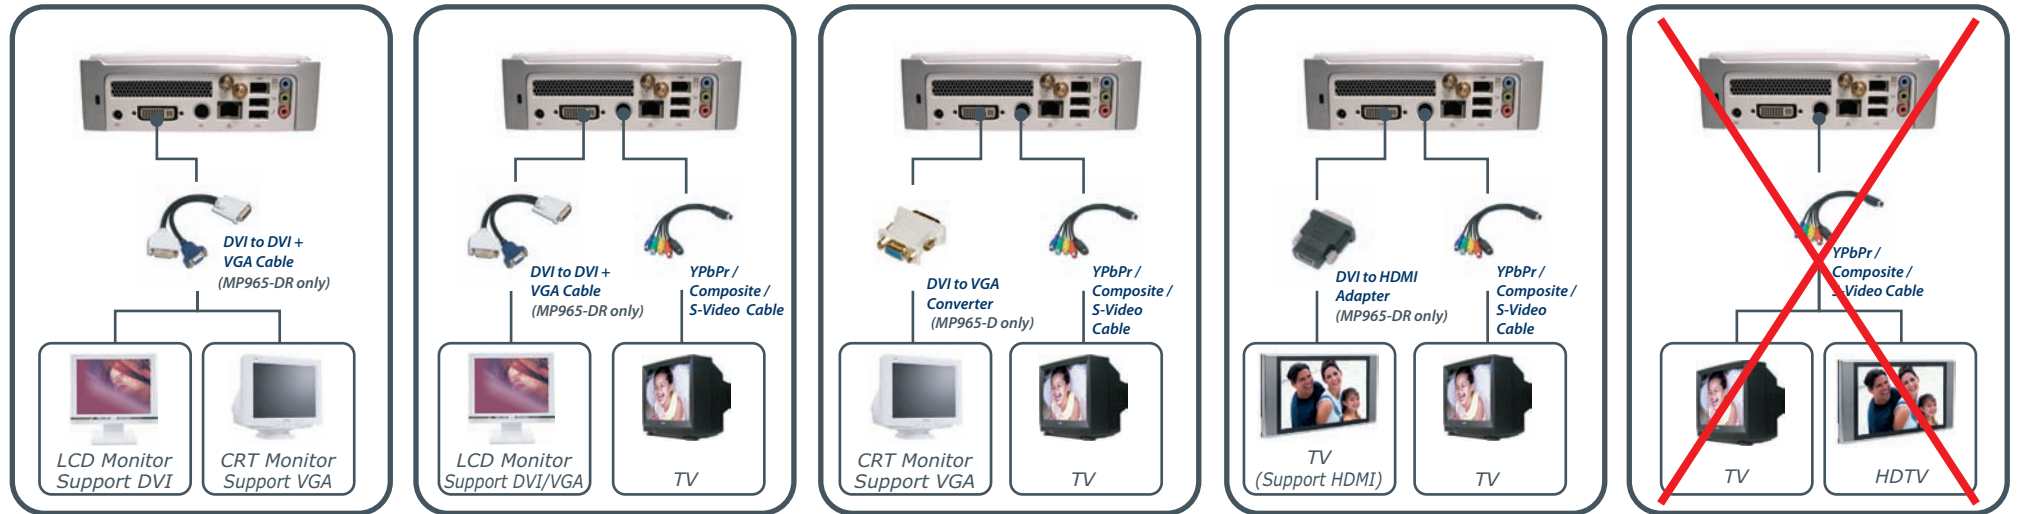

- 1) A driver CD ships with the unit. Simply connect an external CD drive and put the CD in the drive. The disk should run automatically.
- 2) Visit the InfoLogix website at www.infologix.com/pcdriver to download the appropriate drivers.

Back Panel Connections

Dual Display
